

Expense Reimbursement Process

Department:	Finance	Document Owner:	Finance Controller
Version:	4.0	Effective Date:	2024-01-01
Document ID:	SOP-FIN-001	Review Cycle:	Annual

1. Purpose

Define the standard process for employees to submit, approve, and receive reimbursement for business-related expenses.

2. Scope

All employees submitting business expenses. Excludes capital expenditures and vendor invoices.

3. Procedure

Step 1: Incur and Document Expense

Obtain itemized receipts for all expenses over \$25. For meals, document business purpose and attendees. Credit card statements alone are not acceptable. Save receipts digitally using the Expensify app.

Step 2: Submit Expense Report

Log into Expensify and create a new expense report. Attach all receipts and categorize expenses correctly. Submit no later than 30 days after expense was incurred. Late submissions require VP Finance approval.

Step 3: Manager Approval

Direct manager receives email notification and must approve or reject within 3 business days. Manager verifies business purpose, policy compliance, and budget availability. Approved reports route to Finance for processing.

Step 4: Finance Review

Finance team validates receipts match report entries. Checks for policy violations (e.g., alcohol over \$50/person, hotel over \$250/night without pre-approval). Flags exceptions to Finance Controller.

Step 5: Payment Processing

Approved reports are processed in the bi-weekly AP run. Reimbursement via ACH to employee's bank account on file. Employees notified via email when payment is released.

Step 6: Exception Handling

Out-of-policy expenses returned to employee with explanation. Employees may resubmit with manager written justification. Second denial is final; no escalation path for personal policy exceptions.
