

Employee Onboarding – IT Account Setup

Department:	IT Operations	Document Owner:	IT Help Desk Manager
Version:	2.3	Effective Date:	2024-01-15
Document ID:	SOP-IT-001	Review Cycle:	Annual

1. Purpose

This SOP defines the process for provisioning IT accounts and equipment for new employees joining the organization.

2. Scope

Applies to all new full-time, part-time, and contract employees across all departments.

3. Procedure

Step 1: Receive Onboarding Request

HR submits a new hire form via the ITSM portal at least 5 business days before the start date. The form must include: full name, job title, department, manager name, start date, and required software list.

Step 2: Create Active Directory Account

IT creates an AD account using the naming convention: firstname.lastname@company.com. Set a temporary password following the password policy (min 12 characters, upper/lower/number/symbol). Account is created in the appropriate OU based on department.

Step 3: Provision Email & Collaboration Tools

Assign Microsoft 365 license based on the employee's role tier. Add user to department distribution lists and Teams channels. Set up email signature template.

Step 4: Configure Hardware

Retrieve pre-imaged laptop from asset inventory. Apply latest security patches and antivirus updates. Install role-specific software from the approved software list. Encrypt hard drive using BitLocker.

Step 5: Set Up Access Permissions

Grant file-share and SharePoint permissions based on department access matrix. Submit access request to system owners for any specialized applications. Document all permissions in the access log.

Step 6: Deliver Equipment & Credentials

Schedule delivery or desk setup before start date. Provide employee with credentials in a sealed envelope. Brief employee on IT security policies and acceptable use policy.

Step 7: Verification & Documentation

Confirm all systems accessible within 24 hours of start. Close the onboarding ticket and update the asset register. Notify HR of completion.
