

Change Management Process

Department:	Operations / IT	Owner:	Change Manager
Version:	4.0	Doc ID:	SOP-OPS-005

1. Purpose

Provide a structured approach for managing changes to IT systems and business processes to minimize risk.

2. Scope

All changes to production systems, business processes, or organizational structures.

3. Procedure

Step 1: Initiation & Request

Relevant stakeholder submits request through the designated channel. Initial review conducted by Operations / IT team within 1 business day. Assign ticket or tracking ID to request.

Step 2: Review & Validation

Verify all required information and supporting documentation is present. Conduct initial assessment against policy requirements. Flag any missing information and request from submitter.

Step 3: Processing & Execution

Authorized Operations / IT team member processes the request following all applicable policies. Document all actions taken with timestamps. Escalate to supervisor if exceptions arise.

Step 4: Approval Workflow

Route to appropriate approver based on type and threshold. Approver reviews within SLA and approves, rejects, or returns for revision. Document approval decision in system of record.

Step 5: Completion & Communication

Notify requestor of outcome via official communication channel. Update all relevant systems and records. File documentation per retention policy.

Step 6: Quality Check & Closure

Verify all checklist items complete. Close request and capture any feedback. Escalate unresolved issues to manager.
